

Tips for Packing Your Starter Kit Bag

Here are a few suggestions you might want to try, or modify, when packing out your Starter Kit Bags for classes.

You'll first want to click on [Packing Checklist](#) to help you determine what items you may need for a class.

Then, as you start packing your Starter Kit Bag, you may want to begin by placing your Face Cases in first. They will provide a sturdy bottom for the bag. Depending on how many Face Cases and how much product and literature you'll be packing, you may try shifting the Face Cases around to get the best fit.

And, speaking of literature, such as Beauty Books and your datebook, you might consider storing those pieces in the side pocket of your Starter Kit Bag. Another good way to transport literature is in your On-The-Go Tote.

You might consider packing your samplers and products in Quick Zip bags to keep things organized.

And, if you plan to take a Travel Roll-Up Bag filled with sets illustrated in the Beauty Book, you might consider propping it on top of the Starter Kit Bag as a more convenient way to carry both pieces.

But of course, how you choose to pack your Starter Kit Bag is really up to you. We know that everyone has her own individual way of preparing for a class, and we hope this gave you a few ideas!
